## The spread of Drugs In Saudi Arabia And Its Dangers upon The Generations In Future

Mithaq K. J.

Assistant lecturer / Regional Studies Centre

### Abstract

Saudi Arabia during the last ten years witnessed a significant increase in the size of drugs problem . The drugs materials during 1970 were too little. Then in 1980 had witnessed some increase. During the last five years the ratio of those who take drugs increase four times to reach in 2005 "33.7%" The increase in per capita in Saudi and the wrong information concerning drugs as well as the coming labour force all these fibers reflected the reasons behind the spread of drugs which threaten all society. Therefore, Saudi Arabia tries to make good efforts to face this danger boot it needs some concentration upon informative aspect.
